

LIGHT UP YOUR LIFE WITH CLARKE INFINITY

Perfect your homes lighting at the touch of a button

Clarke Infinity's Lighting Division has decades of experience in designing, installing and maintaining lighting solutions to create the perfect ambience.

Lighting sets tone, establishes the mood, becomes a feature and even ensures safety and security. And if that wasn't enough, lighting requirements change depending on the setting, time of day, weather... We have all been to a restaurant where the atmosphere is not quite right and that often comes down to the lighting, too bright, wrong colour etc. Getting it right and making the most of lighting can be tricky and that is when talking to an expert is invaluable.

At Clarke Infinity, we understand that each and every home is different which is why our bespoke solutions are completely tailored to you and your home.

Here are some reasons why you should speak to Clarke Infinity today:

Tailored to you: a lighting system designed to respond to your specific needs and home with simple operation guaranteed.

Expert advice: bespoke solutions custom-made for you that create a desired colour palette and design fixtures, light shades and light modules to enhance your home interior and exterior.

Creating the perfect ambience: lighting designed to reflect you, your mood and activities designing a system that delivers comfort, provides convenience and seamlessly adapts to your needs. Set the mood with just one button, perfect lighting control allows you to create personalised lighting scenarios for every occasion.

Optimising light: control of the light in your home is about more than electric lights, it also involves the ability to decide how much sunlight enters a room. We design lighting and blind systems that work together to help you optimise natural light.

Fully integrated systems: integrated technology to ensure all your home's digital systems work together from lights and blinds to HVAC, audio/video and home security systems.

Make your life easier: pre-programmable solutions, all on/off buttons, sensors that detect daylight levels or occupancy/vacancy in the room, app to adjust/check lighting and more. We design systems that work in synergy with the changing environment.

Improved well-being: ensuring optimum light levels in your home can aid sleeping patterns, promote relaxation and energise the body and mind.

Energy efficient: make the most of natural light and ensure technology helps you to be energy efficient, reducing your electricity bills and conserving the environment

Benefits include:

- Creating the perfect ambience
- Luxurious feel
- Embracing natural light
- Time saving
- Enhancing security
- Hassle-free
- Delivering health benefits
