

## SMART SECURITY AI CAMERA HUB

Keeping our homes as secure as possible is something that we all strive towards, especially when it comes to the safety of our families. That is why Clarke Infinity are now offering you the new must-have addition to your home security system – the Clarke Smart AI Camera Hub.

This brand-new intelligent software acts as an extension to your home security system. Say goodbye to waking up in the middle of the night to the cat setting off your home alarm – this fantastic technology can detect the difference between human and animal movement.

This new hub gives you, the user, the ability to pick and choose what you wish to be notified about, from cars and people, to identifying specific delivery companies such as Royal Mail. Feel at ease in your home and reassured that any alarms are only set off due to accurate detection of movement.

**Give the Clarke team a call on 01277 624444 to book a consultation and start the journey to a safer home today.**

The Clarke Smart AI Camera Hub allows you to enjoy the following added benefits to your security system:

- Easy-to-use application, compatible with both iPhone and Android
- Access securely and stream from your phone, laptop or tablet anywhere, anytime
- Ability to differentiate between human and animal movement reduces false alarms and improves accuracy of intruder alerts
- Clear, reliable picture quality
- Identify movement in low light conditions
- Personalise how much information your app provides on detected movement, improving alerts by providing feedback through the app
- Motion-triggered security lighting during set hours
- Choose to be notified about movement from cars, people, trucks, buses and more
- The AI management hub is an intelligent software and a suitable extension for IP security cameras by over 50 manufacturers
- Programmed into your system by the Clarke Infinity team seamlessly incorporating the new technology
